

# **FORKLIFT GUIDERAILS**

Protect your racks from forklift impact while providing higher speeds and maximizing warehouse efficiency.

# FORKLIFT GUIDERAILS

**Keep vehicles on track and prevent rack damage!**

Guiderails improve the safety of your operations by keeping vehicles on track inside your racking aisles, allowing higher forklift speeds and maximizing your work efficiency. Using guide rails will help reduce accidents, protect the integrity of your racks and stored goods. Red Steel guiderails work in perfect harmony with Selective and Cantilever Racks.
