MODULAR SAFETY NETS

Prevent items from falling off the racks!

SAFETY NETS

Designed to enhance safety in storage and warehousing environments.

Red Steel Safety Nets are crafted with meticulous care and precision, ensuring you get the best safety netting for warehouse racks. These nets are used to prevent items from falling off pallet racks, helping protect both the inventory and the people working below. They act as a barrier, securing items that are stacked on pallets, reducing the risk of accidents and product damage.

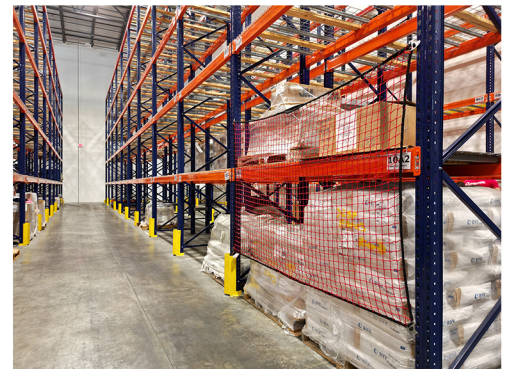

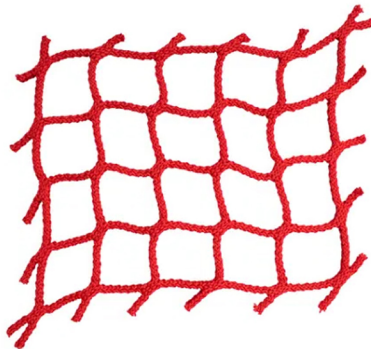

FEATURES

- Strong polyamide nylon mesh with reinforced rope edges.
- Keeps workers and products safe from injury and damage.
- Attaches easily to teardrop pallet rack uprights with J-hooks.
- Easy-to-install and dismount (no tools required).
- High visibility red color for safety checks.
- Allows inventory visual from the bottom of the racks.
- Engineered specifically for warehouse purposes.
- Add extra layer of safety ensuring compliance with regulations.
